Abstract

The purpose of this study is to analyze word usage i.e. taboo words in the movie *The Wolf of Wall Street* and this study uses the approach through Sociolinguistics. The film is 3 hours long and has found 34 words containing taboos. This research was conducted to identify the taboo words and its types. This study applies qualitative methods to describe the conditions in a film. Data in form speech is spoken, while the data context is from the video of the movie of *The Wolf of Wall Street*. The data are collected by selecting a dialog that contains taboo words after watching and using the transcript of the film as additional reference. The writers focus on the dialogue spoken by all characters in the film which contain taboo words. The results of this study are as follows. First, the found taboo words can be divided into three, namely (1) banned behavior, (2) banned topics and (3) banned terms. Second, the type of the taboo words can be divided into four types: (1) epithets are found seven times, (2) profanity are found six times, (3) vulgar are found ten times, and the last (4) obscenity are found eleven times.

Key words: Sociolinguistic, Taboo Words, Taboo Types.

A. INTRODUCTION

Language is important in life since in a long time ago. Language has symbol, style, word, or even

through movement. Language does not only about writing or speaking, but also about reading, listening. Language can be expressed through

body, book, music, etc. Language ability is very worthy in life because language is the base to build communication.

In today life, language becomes more important, because we cannot communicate each other without one. One of the languages is English. English has become an important popular language for international communication and people always call it as an international language.

Language is an effective tool to make relationship and network. Language is a signaling system which operates with symbolic vocal sounds and used by a group of people for the purpose of communication. Social interactions either daily communication are constantly linked to other through language. Obviously, language plays an important role in human life together.

From this perspective, language is where social organization are produced and disputed. At the same time, people's cultural identities come into existence. In effect, language constitutes realities and identities. There are many kinds of

non-standard languages and cultural identities that build by language; one of non-standard and cultural identities language is taboo words.

The statement above does not definitely agree with phenomena in *The Wolf Of Wall Street* movie. In this movie, the researcher finds many taboo words which are used by the characters.

Therefore, the researchers would like to identify the taboo words in *The Wolf of Wall Street* movie. It is often assumed that the majority of people who regularly use taboo words come from a lower socioeconomic status or a lower education level. However, these assumptions are often incorrect. For example, it can be regularly observed that people with higher or average level of education also use taboo words in various social situations and interactions. Based on the writers' observations, *The Wolf of Wall Street* movie is one of many movies that can be examined through this research in terms of Taboo Words. Moreover, it is interesting to analyze.

The analyzing of taboo words in movie need some questions to build core of discussions that is why the writers need to formulate the problem referring to the background, the writers formulate the problem into questions as follow:

1. What are the taboo words found in *The Wolf Of Wall Street* movie directed by Martin Scorsese?
2. What taboo words types are found in *The Wolf of Wall Street* movie directed by Martin Scorsese?

Sociolinguists are interested in how we speak differently in varying social contexts, and how we may also use specific functions of language to convey social meaning or aspects of our identity. Sociolinguistics teaches us about real-life attitudes and social situations

According to Putra & Inggris (Putra & Inggris, 2016)” Sociolinguistics is a branch of linguistics. It is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used”. It means that sociolinguistic is a branch of linguistic

that studies the reaction between language and society, such as dialect, gender differences, or sociolinguistic. According to Wardhaugh (Wardhaugh, 2013) “Sociolinguistics is the study of our everyday lives – how language works in our casual conversations and the media that we are exposed to, and the presence of societal norms, policies, and laws which address language”. It means sociolinguistic discusses about how people speak different social situations.

On other hand Trimastuti (Trimastuti, 2017) says the “sociolinguists aims to move towards a theory which provides a motivated account of the way language is used in a community, and of the choices people make when they use language.” It means that sociolinguistic is a study of language variety on and that the purpose of such study is to find out what variation tell us about language and speakers.

It can be concluded sociolinguistic is a study the relationship between language and society. In this case, some of social groups use special

terms want to show about identity, power, gender, and politeness.

While taboo words are a wide phenomenon across the world and it has become very sensitive that the word taboo itself is a taboo. Words or sentences, even some topics, have at the moment become very sensitive to talk about that they have become taboos. Someone who ever used the expression like “You’re suck” whether to humiliate the interlocutor or even to tell the truth are used taboo. Taboos arise out of social constraints on the individual’s behavior where it can cause discomfort, harm or injury.

According to Wardhaugh in Afrilia (Afrilia, 2016) “taboo is associated with cultural meanings expressed in language.” It means taboo is related with culture. Wardaugh also states that there are some kinds of taboo, which are related to mother in law, animal, sex, death, excretion, bodily function, religion.

According to Race (Race, 2017) “taboo words are often described as unpleasant or ugly- sounding and why they are miscalled dirty words.”

It means sometimes taboo words could be unpleasant for some people and mistaken as dirty words.

Based on experts above, the writers have concluded that taboo is the sense of prohibition for not doing something. If there is an act of mentioning the language about something, it will apply that will make something less pleasant.. The prohibition of this mention generally applies to certain circumstances.

Taboo also has some types. According to Allan and Burridge as quoted by Hashemian (Hashemian,2014) expressed that “taboos arise out of social constraints on the individual’s behavior where it can cause discomfort, harm or injury”

1. Bodies and their effluvia
2. The organs and acts of sex
3. Diseases, death and killing, physical and mental handicap
4. Religion and church, naming and addressing sacred persons, beings, objects and places
5. Food gathering, preparation and consumption

6. Prostitution, narcotics, and criminal activity.

According to Batistella in Anggita (Anggita, 2015) identifies four types of taboo as follows:

1. Epithets is characterized by the existence of several types of slurs and usually connected to race, ethnicity, gender, sexuality, one's appearance, and disabilities such as Nigger, bitch, wop, motherfucker, midget, gimp, and retard.

2. Profanity can be categorized as religious cursing because it usually includes the foul-mouthed use of what is considered to be sacred. The words that belong to this type are Blast, Christ, Gosh, Jess, Jesus Christ, Goddamn, Hell, and Damn.

3. Vulgarity refers especially to words or expressions that contain sexual anatomy and excretory function in a rough manner. The words that belong to this type are such as ass, tit, cock, dick, cunt, prick and balls.

4. Obscenity is defined as words or expressions involves sex differentiating anatomy or sexual and excretory function that usually

uttered in rough manner. For example: piss, crap, fart, shit, fuck, Bastard, and wank.

According to Saville Troike in Michael & Ph (Michael & Ph, 2017) identifies three types of taboo as follows:

1. Taboos Related to Decorum

This type of taboo has to do with avoiding terms considered obscene for moral reasons. It refers to body parts, body functions, and sex. For example the words penis can be replaced by dick or cock.

2. Taboos Associated With Respect

This type of taboo includes the avoidance of direct reference to the name of a ruler, a husband, the aged, mother-in-laws, or silence in their presence.

3. Interlingua Taboos

This type of taboo includes where an acceptable word in one language sounds like one which is taboo in another.

According to Race (Race, 2017) based on psycho motivation, taboo words divided as three types."

a. Taboo of Fear

Taboo of fear is something that has a power and have something scary and believed can haunt someone's life. Using some names of God, sacred things, and some malediction words are types of taboo of fear. For example "go to the hell, die, and damn"

b. Taboo of Delicacy.

This taboo contain about some types of words which make bad feeling in someone's thinking and make other become embarrassed because this kind of taboo. This taboo uses some name of disease, weakness, and a lot of disgusted things from human bodies. For example taboo of delicacy in the movie: blind, gooks, shit.

c. Taboo of Propriety

These types of taboo related with gender, some parts of body and other insulting words that rude or forbidden to say. For example people usually say Fuck, tits, and balls. Not only that this kind of taboo use some rude word like name of animals like bitch. This is a kind of taboo that has so rude power.

From the above theories, we can conclude each type by characterizing following (1) Taboo is something scary, deals with supernatural and is believed can haunt someone; (2) Taboo of delicacy is something uncomfortable, relating to human endeavor to avoid direct performances to unpleasant things; (3) Taboo of property is something inappropriate related some parts of body and other insulting words that rude forbidden says.

Nowadays, people like to watch movies. Movie is a tool to deliver a message or tell a story. Sometimes people watch movie as entertainment and stress reliever. Movie has many genres, such as horror, thriller, comedy, romance, action, fantasy, sci-fi, etc. People can choose the genre that they like. Movies can be adapted from books, comics, or even daily life. Below are the supporting theories about movie.

According to Putra & Inggris (Putra & Inggris, 2016) "Movie can be stated as a product of the human culture that often has a message and value which is very important to be both analyzed and studied in order to attain a greater knowledge." It means

movie can be used to deliver a message that can be analyzed to gain more knowledge.

According to Magasic (Magasic, 2015) "The benefit of films for English learning has been theorized to relate to the way in which the medium provides a rich, multimodal environment of both audio and visual information." It means films can be used as a media to learn English, to improve the ability in hearing and to get a lot of vocabularies.

Based the explanation above, the writers have conclude that movies is a media to tell a story, deliver a message, entertainment that usually tell about story. From the movies people can learn through the message that contained in the story.

B. RESEARCH METHOD

In doing this study investigation, the writers use research method and some procedures to complete.

1. Research Method

This study uses descriptive qualitative method. Descriptive qualitative method of study is applied since it is the most ideal one.

2. Time and Place

This study doesn't require any special place to be conducted since it is a library research. The writers do not need particular place to observe the data. Furthermore, this study takes enough time or could be said only needs 6 months to be conducted.

3. Object/Data Source

The data related to this study is collected from the movie *The Wolf of Wall Street*.

4. Data Collection Technique

The main data of this study was taken from the movie '*The Wolf of Wall Street*' directed by Martin Scorsese in 2013. The data are in the form of dialogues of characters that related to taboo words. The writers collected data by doing library research. Second the writers watched the movie carefully and pay attention to the source. Then the taboo words that are identified in the dialogue are collected.

5. Data Analysis Method

In analyzing the data, the writers analyze the data of taboo words by using theory as Lovihandrie et al (Lovihandrie, Mujiyanto, & Sutopo, 2018) and analyze taboo types by using the types given by Batistella as quote (Anggita, 2015)

6. Research Instrument

Below are the research questions:

1. What kinds of trauma are experienced by the main character Joy?
 2. What are the symptoms of trauma that experienced by Joy?
- What are the taboo words found in *The Wolf Of Wall Street* movie directed by Martin Scorsese?
 - What taboo words types are found in *The Wolf of Wall Street* movie directed by Martin Scorsese?

C. RESULT AND DISSCUSION

In this section, the writers are going to analyze the taboo words in *The Wolf Wall Of Street* movie, along with found, type and most common of the taboo words. The theory that the writers used in this chapter is theory from (loviehandrie,mujiyanto,& sutopo).

The writers analyze all the taboo words found in *The Wolf Wall Of Street* movie in order to find out the types of taboo words and the reason why the characters are using taboo words. The writers analyze the taboo word used the theory as shown in before.

To answer the above questions, this study uses the theory of Briere and Scott (2016) to identify the types of trauma (table 1). To know the symptoms of trauma (table 2), this study uses the theory of Jaffe, Segal and Dumke (2016).

Taboo Words Found in *The Wolf Wall Of Street* Movie

In this research, there are thirty four taboo words found. The following data are found based on characteristic and explanation given by Lovihandrie et al.

Banned topic

There are data that found as taboo words banned behavior. Here they are:

Data 1

Cock (00.02.28)

These taboo words to identify as types obscenity, because in this dialogue Jordan said **dog-shit** is meaning obscene words for unacceptable behavior.

Most Common Taboo Words *The Wolf Wall Of Street*

In part, the writers will show the types of taboo words that most used in each dialogues of character in *The Wall Wolf Of Street* movie Directed by Martin Scorsese. The making this table

based on the taboo words that found in the movie.

No	Types	Quantity
1	Epithets	7
2	Profanity	6
3	Vulgarity	10
4	Obscenity	11

D. CONCLUSION, IMPLICATION AND RECOMENDATION

Based on the analysis above, the writers found that there are 34 taboo words uttered by the character in *The Wolf of Wall Street* movie. The characters in the movie shows uses taboo words in both formal and informal setting which can be interpreted that they used as part of their daily communication. The writers are going to conclude the result of analyzing taboo words in *The Wolf Wall Of Street* movie directed by Martin Scorsese. The results are as follow:

First after analyzing the taboo words in *The Wolf Wall Of Street* in movie, the writers found thirty four taboo words used by characters. There are banned topics and banned term writer discussed in previously section. The meaning of each taboo words

based on the context of dialogue and by whom the characters speak. It means one taboo word could have two different meaning, for example the word **fucking hookers** has two different meaning, and they are excellent or admirable person and a desired person.

Second the types of taboo words can be classified into four types including Epithets, Profanity, Vulgarity, and Obscenity.

Third the data findings types are: Epithets 7, Profanity 6 Vulgarity 10 and Obscenity 11. It can be concluded that Obscenity is the most common taboo words used by the characters in *The Wolf of Wall Street* movie.

For the readers who read this study the writers wish that it can help and give inspiration in doing next study i.e. in analyzing taboo words. Analyzing taboo words through movie is not too easy that is why the writers have to find the movie that uses many taboo words. Besides, the writers have to pay attention the different between slang and taboo words because some of slang words almost same with taboo words that is why in doing analyzing, the writers need taboo dictionary.

In analyzing taboo words, the writers should have more chance and opportunity to observe this cultural phenomenon in order to add the reference about taboo words. This study also expected to give additional knowledge about taboo words that should not be used in daily communication because it's not acceptable in our society yet. This research only focuses on analyzing taboo words uttered by the character in *The Wolf of Wall Street* movie. There are other problems such as gender, motives, and also a social status that may influence the use of taboo words which can be observed by the next writers who are interested in taboo words. Moreover, other researchers can use other movies as the data related to those problems which are also worth analyzing.
